CONFERENCE OVERVIEW

The objectives of the ICEG 2023 will concentrate on innovation, creativity, advances, and new approaches in the field of engineering/environmental geophysics and related fields that have global impact.

The conference theme this year will focus on “Geophysics’ Role in Sustainable Development and Climate Change” and the technical program will feature 99 presentations in 15 oral sessions and 8 poster sessions sharing their current research and challenges, visiting from more than 21 countries. This conference promises to bring a diverse group of attendees, researchers, practitioners and geo-professionals in search of geophysical solutions for near-surface problems.

Panel Sessions

Innovations in mining and exploration geophysics to meet the demand for energy transition minerals

Role and contribution of near-surface geophysics to sustainable future

Keynote Speakers

Biondo Biondi, Stanford University

Enhedelihai Alex Nilot, National University of Singapore

Elita Li, Purdue University

Jianghai Xia, Zhejiang University

Klaus Holliger, University of Lausanne

Lindsay Linzer, SRK Consulting

Paul Bauman, BGC Engineering

Pavel Golikov, Saudi Aramco

Yaoguo Li, Colorado School of Mines

Technical Sessions:

- CCS and Minerals Exploration
- AI & Machine Learning
- Technology and Methodological Advance
- Geothermal and Hydrogeophysics
- Best of ICEEG
- Planetary and Lunar Geophysics
- Geohazards and Risk
- Case Studies in Engineering Geophysics
- Method Development and Monitoring

Pre-conference Seminar:

Multiphysics Approach in Energy Transition: Advances in Methodologies and Application

- Date: 15 October
- Duration: Half Day
- Registration Fee: 150\$ (please email alara@seg.org to register for seminar)

Lectures by:

- Mengli Zhang, Colorado School of Mines
- Taqi Alyousuf, Saudi Aramco
- Yaoguo Li, Colorado School of Mines

This seminar will highlight some of the latest advances in this direction and consists of a set of lectures on multiphysics integration with a focus on electromagnetic, gravity, and magnetic geophysics. The lecture will range from data acquisition, to machine learning-assisted inversions, to applications. View more details on the website - www.seg.org/events/iceg23
