International entrepreneurs and entrepreneurially-oriented smaller firms have dominated the growth of the global economy in the past two decades. These firms have grown to become International New Ventures, Born Global, Born Digitals, Early Internationalizing Enterprises that compete internationally from inception or soon thereafter. They deploy innovative and competitive strategies to achieve growth at home and global markets.

This conference covers all aspects of international entrepreneurship with a special theme 'The Nexus of The Knowledge-Based Economy and International Entrepreneurship' which represents new ways in which innovation, technology & entrepreneurship becomes embedded in industries and societies.
