His Highness Sheikh Khalifa bin Zayed Al Nahyan

President of the UAE

Innovation, scientific research and a knowledge economy will create sustainable opportunity for our future generations. The new Science, Technology and Innovation Policy is a turning point in our march for development and progress.

His Highness Sheikh Mohammed bin Rashid Al Maktoum

Vice President and Prime Minister of the UAE
and Ruler of Dubai

Creativity and ideas can build countries and institutions.
The future belongs to those generate ideas.

H.E Zaki Anwar Nusseibeh

Cultural Advisor to the UAE President
Chancellor of the United Arab Emirates University

The United Arab Emirates University is keeping pace with the UAE directions by celebrating the "UAE Innovates" activities, which is a national event organized annually under the directives of H. H. Sheikh Mohammed bin Rashid Al Maktoum, Vice President of the UAE, Prime Minister and Ruler of Dubai "may God protect him" in line with the vision of the UAE Government that the UAE will, over the next fifty years, be a global hub for innovation and creativity and a capital for the future. Especially since we recently witnessed the launch of the UAE Principles of the 50, which is a map for the future and a reference for all entities to strengthen the foundations of union, build a sustainable economy, and harness all resources for a more prosperous society.

In this sense, the UAEU is committed to participating and overcoming challenges through basic pillars of academic research, technology, and innovation, and in line with competitiveness standards in the knowledge-based economy. The UAEU believes in participating in capacity-building and instilling a culture of innovation in universities and higher education institutions, in order to graduate generations with a spirit of leadership and creativity, through the launch and implementation of the UAE innovative and qualitative initiatives and ideas.

The UAEU - the University of the Future - seeks to establish a new and innovative concept of university education in the Arab world and the region. The UAE development is our great concern, and interest to inculcate a culture of innovation and creativity in our students. In this way, we preserve the heritage of the founding leader Sheikh Zayed "may God rest his soul in peace" and his innovative thought to invest in human energies, which is one of the most important elements for the UAE sustainable development and global leadership at all levels. In addition, it strengthens the non-oil economic activities in the country and the UAE competitive capabilities at the international level.

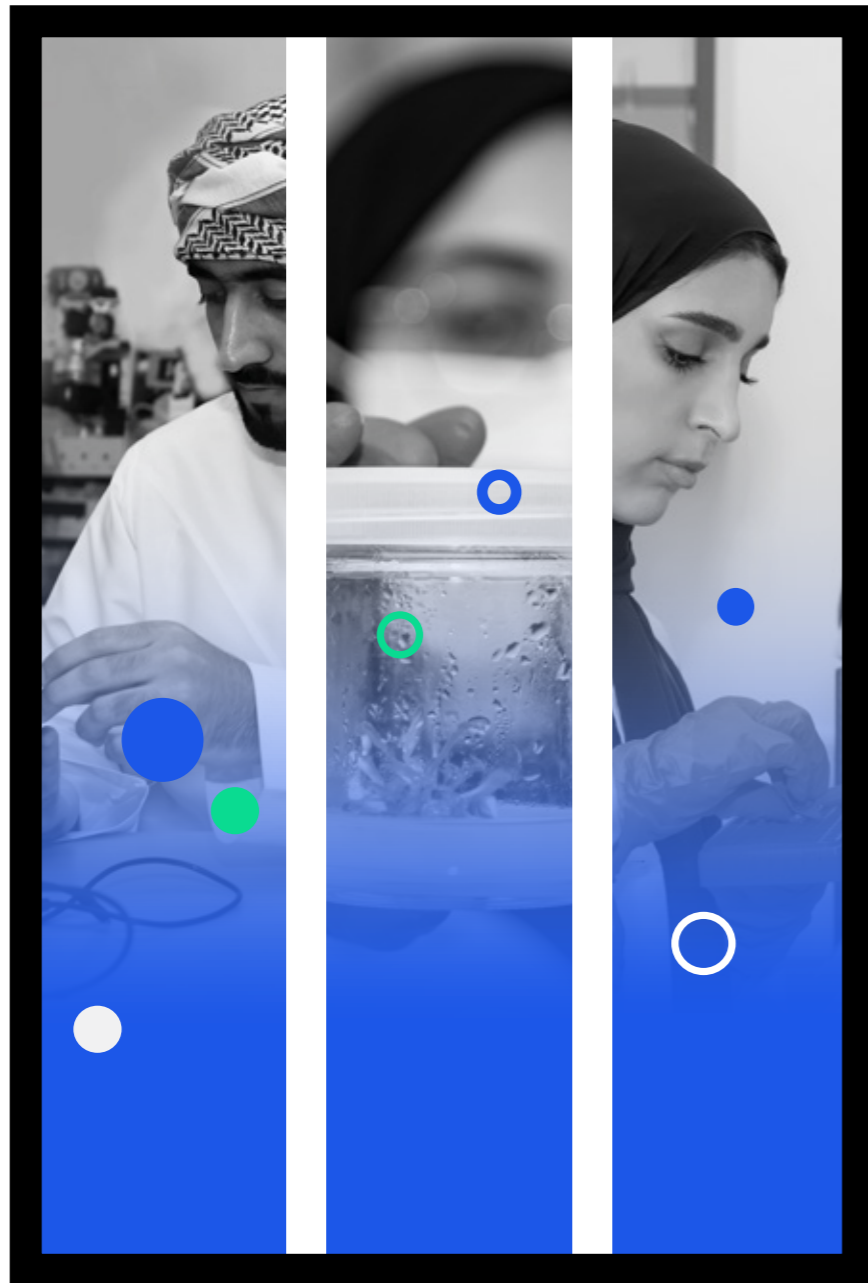

Prof. Ghaleb Al Hadrami Al Breiki

Acting Vice Chancellor of United Arab Emirates
University

There is no doubt that the Innovation Month has become an annual hub and a major platform for launching creative ideas from scientific products and practical applications of the educational process and academic course outcomes.

We, at the United Arab Emirates University "University of the Future", the leading national educational institution, are working on translating the directions of the UAE leadership and embodying the vision of creativity and innovation in all fields, especially in educational institutions that are the main incubator for innovation, through the students and faculty members innovative scientific projects. It comes as a natural response to developing our educational outputs in general and upgrading the academic process, as well as meeting the needs of the labor market of ideas and projects that keep pace with development in order to implement development projects in all fields in light of the knowledge economy, and in preparation for the next fifty years.

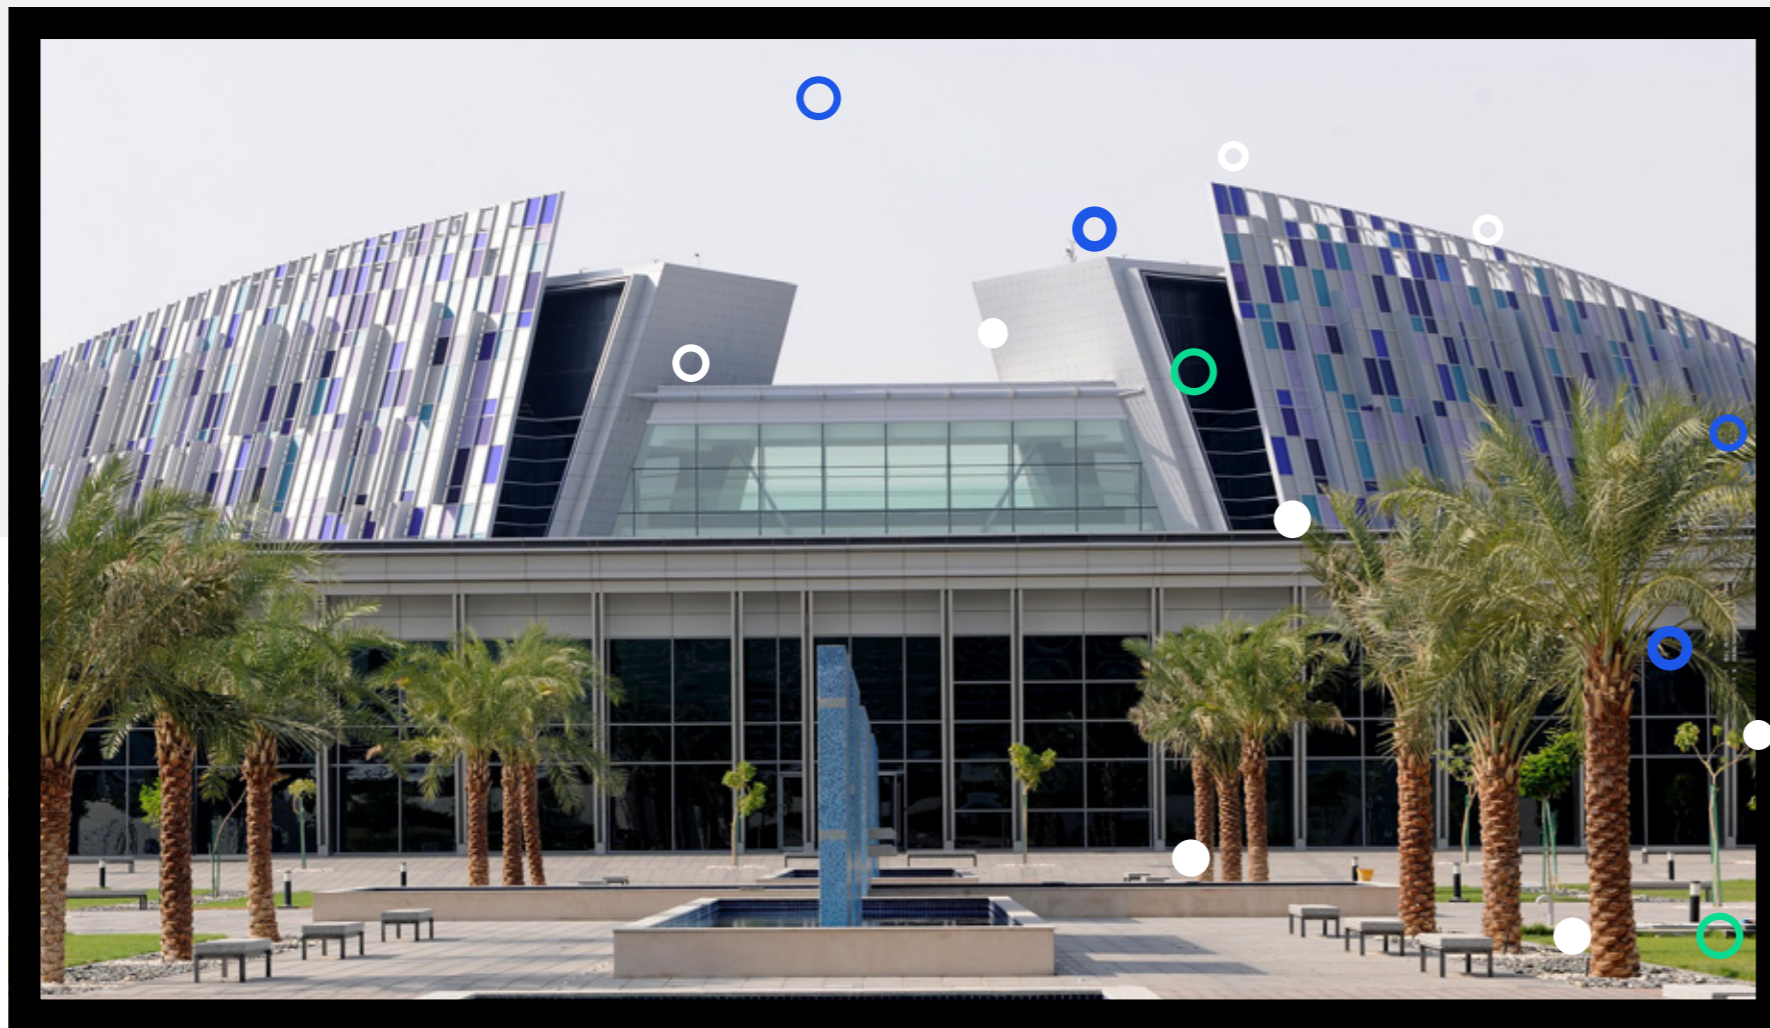

Accordingly, the university has encouraged students and researchers to present their ideas and projects and make innovation a concept and a national platform and a means of sustainability for the optimal investment of the available potentials and capabilities. Especially the activities of "The UAE Innovates 2022" has distinct value this year as it is coinciding with the UAE Golden Jubilee celebrations.

Innovation Support Team

We are all proud that innovation and creativity in the UAE has become a way of life and a national theme on which the UAE future plans and directions are based. At the United Arab Emirates University, we aim to build a high-level educational system based on academic research and innovation. Science is the basis for the progress and development of nations. Our most important investment lies in preparing future generations capable of keeping pace with global economic transformations through innovation, research and development, and acquiring the skills of leadership, creativity, responsibility and aspiration to contribute to enhancing the country's achievements, and supporting its ambitions to reach advanced positions in the indicators of business practice, global competitiveness, innovation, entrepreneurship, research and development.

The UAE Innovation Month is an opportunity to celebrate innovators in appreciation of their creativity and innovations, which will undoubtedly contribute to strengthening the innovation system at both the university and the country. We are always looking forward to translating these innovations and achievements into a tangible reality that contributes to progress of societies and nations, and to continuity of excellence and academic research locally, regionally and globally.

Vision, Mission & Goals of UAEU

Vision

“Leadership and innovation in higher education, research and community service at national and international levels.”

Mission

“UAEU will continue its positive contribution to the advancement of UAE by delivering undergraduate and graduate education that meets international standards, engaging effectively with the community and the world to foster knowledge creation and dissemination, and enhancing the research capacity of the country.”

Goals

- Prepare students to be distinguished in their areas of specialization, leaders and productive members of society.
- Develop research capacity and innovation in areas of national and global importance.
- Expand international accreditation for the university and its academic programs and promote the university's global reputation.
- Promote the University's role in the transfer of knowledge and skills to serve the society.
- Ensure high quality, efficient and transparent administrative services.
- Entrench a culture of innovation in institutional work environment.

Opening of Innovation Events 2022

With an ambitious vision and innovations that make the impossible possible, and dreams a reality that creates the future, and in line with the directives of the UAE government regarding the importance of innovation and building of innovation culture .

The United Arab Emirates University has created every year an atmosphere of innovation and excellence in conjunction with the UAE Innovation Month, which this year in the golden jubilee of a country that makes the impossible possible. At the beginning of February, it launches the "Hope Probe" that motivates us all to give and work in a spirit and determination to face and overcome the challenges.

Here, we celebrate innovation and innovators, so we can all participate hand in hand to cross the gateway to the future, armed with science and knowledge, and participate in the advancement and progress of the UAE.
